DETAILED ACTION

1. This communication is in response to applicant's amendment filed April 6, 2006. Claims 1-6, 8-16, 18-23, 25-28 have been amended. Claim 29 is newly added. Claims 1-29 are currently pending in this case.

Response to Arguments

2. Applicant's arguments with respect to claims 1-28 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art and Srinivasan (US 6,460,076) in view of Stefik et al (US 5,629,980).
5. Applicant's prior art and Srinivasan show the limitations of the claims except for types of digital rights management to which the digital data is to be subjected. For example, Samgoody.com offers the purchase of CD's, tapes, DVD's, etc., containing music and/or video via the Internet, and allowing the buyer to choose the format of the music or video at the time of purchase. It is also well known to download digital data over the Internet.

Art Unit: 3621

6. Srinivasan shows a system and method for selling downloadable digital products over the Internet.

7. Stefik et al for controlling for the distribution and use of digital works.

8. Based on the teaching of Stefik et al, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to combine the two methods of selling and distributing works over a network in order to increase both flexibility and security.

9. Examiner's Note: Examiner has cited particular columns and line numbers in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested that the applicant, in preparing the responses, fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.
